Our Network Technology

GEXTON has an ultra-fast, endlessly scalable network to meet the future demands of the new economy. We utilize several carrier grade Data Centers and top hardware components that ensure reliable services and abundant bandwidth for all users. To keep up with the growing demand, we are constantly expanding our shared hosting infrastructure.

- Fiber optic backbone with public and private peering
- 24 x 7 business operations; with real-time monitoring.
- Web server load balancing and web garden technology.
- Daily Systems File and Database Backups.
- Microsoft Windows 2003 Server and CentOS Linux based Platforms.
- Helm multiple Windows server management and control system.
- Linux cPanel and WHM (Web Host Manager).
- Web Services: Frontpage Office 2003, ASP.NET, PHP, Perl and ColdFusion.
- Database Support: MS SQL Server, MySQL Server, MS Access and Excel.
- UPS battery backup and backup diesel generators.

Your piece-of-mind is our goal. With redundant backbone carriers, load balancing, UPS and backup generators, you know that your site has a reliable and scalable hosting platform.
